Patient Record of Disclosures

Authorization to Release Protected Health Information

In General, the HIPAA privacy rule gives individuals the right to request a restriction for uses and disclosures of their protected health information (PHI). The individual is also provided the right to request confidential communication or that a communication of PHI is made by alternative means, such as sending correspondence to the individual's office instead of the individual's home.

The Privacy Rule generally requires healthcare providers to take reasonable steps to limit the use or disclosure of and request for PHI to the minimum necessary to accomplish the intended use. These provisions do not apply to uses or disclosure made pursuant to an authorization requested by the individual.

Healthcare entities must keep records of PHI disclosers. Information provided below, if completed properly, will constitute an adequate record.
